

August 31, 1995

Mr. Duong Nguyen
Hazardous Waste Management Division H-4-1
U.S. EPA, Region 9
75 Hawthorne Street
San Francisco, California 94105

Dear Mr. Nguyen:

RE: U.S. EPA WARNING LETTER DATED AUGUST 16,1995

This is in response to the warning letter dated August 16, 1995. The warning letter summarized the findings of a hazardous waste investigation conducted at Rollins OPC facility Located at 5756 Alba street Los Angeles, California on June 6, 1995.

Enumerated below are the facility's responses to the comments/issues raised in the warning letter.

## Comment 1:

Submit documentation proving that the pot holes in the secondary containment concrete floor near tank # V-2 have been repaired.

## Response 1:

During the inspection the area designated as the waste water treatment system was under construction to modify and modernize the treatment and waste storage capabilities. The new tank systems required new foundations in other to comply with design criteria in a seismic zone 4 area. During the inspection the inspectors observed some excavated concrete and some borings made to check the thickness of the existing concrete. New foundations have since been constructed in these locations in accordance with good engineering practice and the tank manufacturer's requirements. On August 7, 1995 an independent California Registered Engineer certified the new foundation as complete and ready for use. A copy of the certification is enclosed for your information.

## Comment 2:

Submit documentation proving that a signed copy of the outgoing manifest # LAA 332912 was returned to Rollins OPC from the designated treatment, storage, and disposal facility(TSDF). Also provide documentation proving that as a standard operating procedure Rollins OPC will contact the TSDF if the manifest copy has not been returned within 35 days of the initial shipment date and file an exception report if a copy has not been returned within 45 days of the initial shipment date.

page 2.

## Response 2:

Enclosed please find a copy of the signed manifest # LAA 3329212. The Manifest was signed on April 13, 1995.

Rollins OPC has instituted a system by adding a column on the outgoing shipment logs to indicate when the 35 days will be due. This will ensure that staff are cognizant of the 35 day limit for the return of the manifest. When a manifest is approaching the 35 days limit a call will be placed to the TSDF to remind them to send the signed manifest immediately. Incidents of late returns will be highlighted on the tracking log and corrective actions will be taken where appropriate.

I trust that the information provided in this letter will adequately answer the issues raised in the said warning letter, and return the facility to compliance. If you have any further questions please contact me at (213) 585-5063.

Sincerely

William J. Mitzel

President
